

Offshore Wind Alert

Governor Carney and governments in Rehoboth Beach, Dewey Beach, Bethany Beach, South Bethany, and Henlopen Acres are considering selling their right to question, criticize, and sue US Wind in return for a pittance in payments. New Jersey beach communities passed resolutions against offshore wind, initiated lawsuits, and stopped projects off their coast. Federal agencies tasked with approving the US Wind projects admit:

Vessel collisions will increase, and US Coast Guard Search & Rescue Operations will be delayed. That means increased risk of human death

Noise from construction and operations will harass marine life including endangered species. That means more marine life deaths, and risks extinction of the North Atlantic right whale

Turbines visible from shore will dominate the view especially from flashing red lights at night. That means potential lost tourism and lower property values

Turbines will interfere with civil and military radar. That risks vessel collisions and reduced military security

Commercial fishermen will abandon fishing in lease areas. That means lost income for fisherman, and lowers food security

Tell the Governor and the towns to stop these agreements
